1.6 big group check in	3

1 week 6: Conference paper workshop day I

Agenda

- work on papers -> toward annotated bibliography
- check in with me
- check in with larger class
- goal for today: leave class with 15-20 papers inside a zotero folder

1.1 introducing annotated bibliography assignment - 10 minutes

what's next with the papers:

- 5 sources per person, 4 at the least (syllabus says 10-15, but was for 2-3 person groups).
- helping to get the ground research
 - to form the perimeters of what's already been done in your topic
 - help you to further refine your questions
 - if you're doing a review type of paper, will also form your analysis as well
- will also form the basis of the lit review for the paper
- needs to include:
 - a short summary of the source (3 sentences), and

- an explanation of how it may be useful for the project (1-2 sentences).
- also due, in two weeks, a detailed outline of the paper.

1.2 instructions for annotated bibs - 10 minutes

- how to read a conference paper: 3 passes.
 - first pass:
 - * read only the most important sections, 10 - 15 minutes per paper
 - * abstract, introduction, headings and subheadings, conclusions.
 - * ask 2 things:
 - category: what type of paper is this? a review of work? an evaluation? an experiment? an analysis of an existing system?
 - contribution: what are the paper's main contributions?
 - second pass:
 - * read the paper in full, up to 1 hour per paper.
 - * where you will identify any potential gaps or areas of further research.
 - * how is this useful for your project?
 - third pass:
 - * re-create the paper at each step, question every assumption.
- places to look:
 - FAccT proceedings
 - ACM digital library
 - ACL anthology
 - google scholar
- strategies for looking:
 - checking keywords, conferences, topics.

1.3 finding articles activity - 30 - 45 minutes

- goal is to leave class with a list of 15-20 sources, with 4-5 assigned to each member in your group.
- assign each person a turf:
- by sub topic or by venue (conference)
- each person completes a first pass on a number of articles on their turf
- final goal is to have at least 4-5 articles

1.4 break

1.5 group check-ins - 45 minutes - 1 hour

First, think about:

- what is the priority for your group at this point in the process
 - what do you need to discuss with your group today

Then, in groups:

- decide on regular meeting schedule (if you don't have one already)
- continue to work on finding papers

1.6 big group check in

- what is your area of research?
